OFFICIAL STATEMENT FROM MYRON EBELL, SENIOR ADVISOR, FIX THE EPA VETO COALITION, ON THE **Bipartisan American Affordability and Jobs Act of 2026** (SENATE PERMITTING BILL)

November 9, 2026—"Tonight, the Senate voted to begin fixing one of the greatest threats to American energy, mining, and infrastructure investment: the EPA's unlimited power to veto Clean Water Act permits even after projects have been permitted, financed, and are under construction. The Bipartisan American Affordability and Jobs Act finally puts an end to post-permit vetoes, and the Fix the EPA Veto Coalition commends the senators of both parties who stood with the workers, communities, and investments that depend on permit certainty. But make no mistake, tonight was only the first step. We urge the Senate to stay on this bill, beat back any attempt to weaken its veto protections, and get it to the President's desk, and we call on the administration to finish the job with an EPA rule that confines the veto to the permitting process once and for all."

About the Fix the EPA Veto Coalition

*The **Fix the EPA Veto** Coalition is committed to protecting American jobs, energy development, and infrastructure by ensuring that 404(c) authority can never again be weaponized as a political tool against the energy, mineral, and infrastructure projects vital to U.S. economic strength and national security.*
